

# THERMA-FUSER™

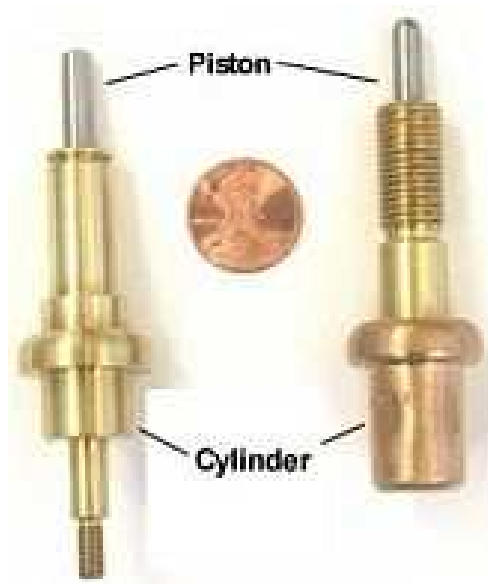

THERMALLY POWERED VAV DIFFUSER

## BULLETIN

### Aerospace Technology

Acutherm thermostats are a more robust version of those used by aerospace industry for jet engines.

Acutherm Thermostat

These thermostats are brass cylinders filled with carefully formulated petroleum wax. When heated, the wax melts and expands pushing the piston outward. This motion regulates oil temperature in jet engines and room temperature in Therma-Fuser VAV diffusers.

Jet Engine Thermostat
